To fully describe the structure of all tabs, please open or provide the data and column structure for the other tabs in the Google Sheet.

Based on the visible tab, "Reservation Cleaning," the data structure is as follows:

Sheet Name: Reservation Cleaning

This tab seems to track individual cleaning tasks for property reservations.

Column Name	Description	Sample Data
ID	Unique ID for the cleaning entry.	`66b0285b`, `50a00ddc`
Reservation ID	The unique identifier for the property reservation.	`3269568431`, `79822-guest-165201644-confirmation-HMMYQPSBZB`
Date	The date the cleaning took place.	`1/1/2021`, `1/2/2021`
Property	The name or address of the property that was cleaned.	`Gold Hatagaya 201`, `Hatsudai A301`
Cleaning Price	The price charged for the cleaning service (excluding linen).	`0`, `4000`, `7800`
Linen Price	The price charged for the linen service.	`0`, `2640`
Day	The day of the week the cleaning occurred.	`Fri`, `Sat`, `Sun`
Hours	The duration of the cleaning in hours.	`2`
Guest	The number of guests for the reservation.	`2`, `0`, `5`
Beds	The number of beds prepared.	`1`, `0`, `3`
TF	A boolean (`TRUE` / `FALSE`) field, likely indicating a transfer or key collection.	`FALSE`, `TRUE`
Staff ID	The ID of the staff member who performed the cleaning.	`12`, `5`, `6`, `7`
Staff Payout	The amount paid to the staff member for this cleaning.	`2000`, `2500`, `4000`
Transportation	The amount paid to the staff member for transportation.	`500`
No Show	Indicates if there was a "No Show" (`TRUE` if yes, blank if no).	`TRUE`, (blank)
Notes	Any additional notes related to the cleaning task.	`Trash disposal includes`, `Deep Cleaning`
Status	The status of the cleaning task.	`Done`

Here is the data structure for the **Cleaning** tab, including the column name, a description, and a sample data point:

Sheet Name: Cleaning

Column Name	Description	Sample Data
ID	Unique identifier for the cleaning entry.	`2d1e219b`
Date	The date the cleaning took place.	`8/3/2021`
Property ID	The ID of the property that was cleaned.	`17`
Cleaning Price	The price charged for the cleaning service.	`3,500`
Linen Price	The price charged for the linen service.	`0`
Day	The day of the week the cleaning occurred.	`Tue`
Hours	The duration of the cleaning in hours.	`1`
Guest	The number of guests for the reservation.	`0`
Beds	The number of beds prepared.	`0`
TF	A boolean (`TRUE`/`FALSE`) field, potentially for a transfer or key collection.	`TRUE`
Staff ID	The ID of the staff member who performed the cleaning.	`12`
Staff Payout	The amount paid to the staff member.	`2,000`
Transportation	The amount paid to the staff member for transportation.	`200`
No Show	Indicates if there was a "No Show."	(blank)
Notes	Any additional notes related to the cleaning task.	`D4, D7`
Status	The status of the cleaning task (e.g., "Done").	`Done`

Sheet Name: Extra Services

Column Name	Description	Sample Data
ID	Unique identifier for the extra service entry.	``` 80d30861 ```
Date	The date the service was provided.	``` 1/1/2021 ```
Day	The day of the week the service occurred.	``` Fri ```
Action By	The ID of the staff member who performed the service.	``` 15 ```
Services	The type of extra service performed (e.g., "Purchase," "Hourly Work").	``` Others ```
Notes	A detailed description of the service or action taken.	``` Linens Restock (2 sets) ```
Confirmation	Status of administrative confirmation for the service.	``` Approved by Admin ```
Payout (Staff)	The amount paid to the staff member for the service.	``` 0 ```
Transportation	The amount paid to the staff member for transportation.	``` 0 ```
Invoice (Client)	The amount invoiced to the client for the service.	``` 1,760 ```
Client	The ID of the client associated with the service.	``` 4 ```
Property Mgt	A property management ID or code.	``` 79822 ```
Cleaning Mgt	A cleaning management ID or code (appears largely empty in the sample).	(blank)
Status	The completion status of the service (e.g., "Done").	``` Done ```
Invoice For	Who the service was invoiced to (e.g., "Asistee").	``` Asistee ```

Here is the data structure for the tab you are currently viewing, **Cleaning Booking**.

This sheet serves as a master list for all cleaning service bookings, including client details, scheduling, location information, and payment status.

Sheet Name: Cleaning Booking

Column Name	Description	Sample Data
ID	Unique identifier for the cleaning booking.	```bKSh25LI9WEg2SnfHxwlRoKVTihtBVkd```
Service	The type of cleaning service booked.	```Express Cleaning```
Recurring Client	ID of the client if they are part of a recurring schedule.	(blank)
Recurring Address	Address associated with a recurring client (if applicable).	(blank)
Name	The client's name.	```Jeffrey Nunes```
Date	The scheduled date for the service.	```1/2/2025```
Time	The scheduled time for the service.	```13:00:00```
Address	The service location.	```1-35-16 Sangenjaya, Setagaya-ku, Tokyo,154-0024```
Room Number	The specific room or unit number.	```102```
Google Link	A map link to the location (e.g., Google Maps).	```https://maps.app.goo.gl/ZWwXkBcV5xeKkzrR8```
Building Photo	A file path or link to the building's photo.	```Cleaning Booking_Images/bKSh25LI9WEg2SnfHxwlRoKVTihtBVkd.Building Photo.015312.jpg```
Phone	The client's phone number.	```13479228023```
Email	The client's email address.	```jeffreynunes@ymail.com```
Payment Type	The method of payment used.	```Credit Card```
Custom Price	A custom-set price for the service (0 if standard pricing).	```0```
Status	The current status of the booking.	```Cancelled```
Is Complete	Indicates if the service has been completed.	```No```
Notes	Additional information, instructions, or client requests.	```2 hours #2 this is the first cleaning, as I moved in about 2 weeks ago. ...```
Email Sent	Indicates if an email confirmation was sent.	(blank)
Line Sent	Indicates if a confirmation message was sent via Line app.	```TRUE```
Booking Date	The date the booking was originally made.	(blank)
Property Access	Details on how to access the property.	(blank)

Here is the data structure for the tab you are currently viewing, **Recurring Cleanings**.

This sheet appears to log the individual scheduled cleaning events that are part of a recurring service plan.

Sheet Name: Recurring Cleanings

Column Name	Description	Sample Data
ID	Unique identifier for the individual cleaning appointment.	```1dc82d1015620261```
Recurring Client	A flag indicating this is a recurring client booking.	```Recurring Client```
Recurring ID	The unique ID of the recurring client from the client database.	```1dc82d101```
Recurring Address	The address from the recurring client's master record.	```Moto-Azabu House 3-13-11 Motoazabu Minato City Tokyo 106-0046 Japan```
Name	The name of the client or property.	```Motoazabu House```
Date	The scheduled date for this specific cleaning.	```5/6/2026```
Time	The scheduled time for this specific cleaning.	```9:00```
Address	The specific address for the cleaning.	```Moto-Azabu House 3-13-11 Motoazabu Minato City Tokyo 106-0046 Japan```
Room Number	The specific room or unit number.	```House```
Google Map	A map link to the location.	```https://maps.app.goo.gl/HbjNGCE8yTKNCB6DA```
Building Photo	A file path or link to the building's photo.	```Cleaning Booking_Images/7b7dd482.Building Photo.051627.jpg```
Phone Number	The client's contact phone number.	```8049304886```
Email Address	The client's contact email address.	```yu@housingjapan```

Here is the data structure for the tab you are currently viewing, **Recurring Client**.

This sheet appears to be a database for clients with recurring cleaning services, containing their contact, location, scheduling, and payment information.

Sheet Name: Recurring Client

Column Name	Description	Sample Data
ID	A unique identifier for the recurring client record.	```1dc82d81```
Client ID	The client's unique identification number.	```56```
Name	The name of the client or property.	```Adam Gothelf```
Address	The full service address for the client.	```1-3-1-2501 Toyosu Koto-ku Tokyo 135-0061```
Room Number	The apartment or unit number, or type (e.g., House).	```2501```
Google Link	A URL to the location on Google Maps.	```https://maps.app.goo.gl/UQf5x6udqJFD3WXL7```
Building Photo	A file path or link to the building's photograph.	```Cleaning Booking_Images/V446ivdfzF5QD3DcjomfgiPQUUCqJ7oj.Building Photo.080246.jpg```
Phone	The client's contact phone number.	```8049176897```
Email	The client's contact email address.	```AdamGothelf@gmail.com```
Invoice	The amount of the client's recurring invoice.	```10500```
Service Plan	The frequency of the recurring cleaning service.	```Bi-Monthly```
Day1	The primary scheduled day of the week for the service.	```Tuesday```
Day2	A secondary scheduled day of the week (often blank).	(blank)
Payment Type	The method of payment (e.g., Credit Card, Bank Transfer).	```Credit Card```
Payment Link	A URL for the recurring payment subscription (e.g., Stripe link).	```https://buy.stripe.com/00g4if63abL86Tm7st```
IsBook	Indicates whether a booking has been confirmed.	```Yes```
IsActive	A boolean indicating if the recurring service is currently active.	```TRUE```
Hours	The scheduled duration of the cleaning service in hours.	```2```
Time	The scheduled start time for the cleaning service.	```9:00:00```

Here is the data structure for the tab you are currently viewing, **Booking by Date**.

This sheet serves as a detailed log of all cleaning bookings, including scheduling, client information, pricing, and specific notes.

Sheet Name: Booking by Date

Column Name	Description	Sample Data
ID	Unique identifier for the booking.	```1```
Service	The type of service booked.	```Express Cleaning```
Recurring Client	ID of the client if they are a recurring customer.	```1dc82d83```
Recurring Address	Address associated with a recurring client (if applicable).	```3-chōme-50-5 Kameido, Koto City, Tokyo 136-0071, Japan```
Name	The client's name.	```Loren Fykes```
Date	The scheduled date for the service.	```7/29/2022```
Time	The scheduled time for the service.	```14:00:00```
Address	The service location.	```2-28-10-1003 Kamiochiai, Shinjuku, Tokyo```
Room Number	The specific room or unit number.	```1105```
Google Link	A map link to the location.	```https://goo.gl/maps/ug89zh3dGtSk2X8H9```
Building Photo	A file path or link to the building's photo.	```Cleaning Booking_Images/f896e98e.Building Photo.082047.jpg```
Phone	The client's contact phone number.	```818037006799```
Email	The client's email address.	```loren@endymion.jp```
Payment Type	The method of payment used.	```Credit Card```
Custom Price	A custom-set price for the service (0 if standard pricing).	```23100```
Status	The current status of the booking.	```Confirmed```
Is Complete	Indicates if the service has been completed.	```Yes```
Notes	Additional information, instructions, or client requests.	```Deep Cleaning Shower, toilet, kitchen 2 staff with Teresa```
Email Sent	Indicates if an email confirmation was sent.	```Yes```

The **'Property Validation'** sheet tracks operational and financial data for properties managed by Asistee, including active status, cleaning fees, and booking platform IDs from Bcom and Airbnb.

Here is the data structure presented in the requested table format:

Column Name	Description	Data Sample
ID	A unique identifier for the property.	79832
Percentage	A percentage value, possibly related to ownership or commission.	13%
Property	The local name or internal reference for the property.	Lions Mansion Dogenzaka 423
Property Active	Indicates if the property is currently active or available for booking.	FALSE
Client ID	The ID of the client associated with the property.	1
Property Management	A boolean (TRUE/FALSE) indicating if property management services are provided.	TRUE
Asistee Cleaning	A boolean (TRUE/FALSE) indicating if Asistee cleaning services are used.	TRUE
Cleaning Fee	The standard cleaning fee charged for the property.	4000
Invoice Cleaning	The amount actually invoiced for the cleaning service.	4000
Invoice Bed	The amount invoiced for bedding services.	0
Bcom ID	The listing ID on the Booking.com platform (Bcom).	5288465
Bcom Name	The name of the property listing on Booking.com.	Excellent Hot location, Shibuya Time Square Studio Apt! A423
Airbnb Name	The name of the property listing on Airbnb.	

The **'Cleaning Validation'** sheet tracks property details, focusing on active status, client association, management type, and the financial figures related to cleaning and bedding services, comparing standard fees to invoiced amounts.

Here is the data structure for the current sheet presented in the requested table format:

Column Name	Description	Data Sample
ID	A unique identifier for the property.	1
Percentage	A percentage value, possibly related to ownership or commission.	0%
Property	The local name or internal reference for the property.	JSR 201
Property Active	Indicates if the property is currently active or available for booking.	TRUE
Client ID	The ID of the client associated with the property.	12
Property Management	A boolean (TRUE/FALSE) indicating if property management services are provided.	FALSE
Asistee Cleaning	A boolean (TRUE/FALSE) indicating if Asistee cleaning services are used.	TRUE
Cleaning Fee	The standard cleaning fee for the property.	0
Invoice Cleaning	The amount actually invoiced for the cleaning service.	4840
Invoice Bed	The amount invoiced for bedding services.	802.5

The **'Property Staff Payout'** sheet records payment details for staff assigned to various properties. It tracks a unique ID for each property, the total **Staff Payout** amount, and the associated **Transportation** allowance, along with the property's **Active** status.

Here is the data structure for the current sheet presented in the requested table format:

Column Name	Description	Data Sample
ID	A unique record identifier.	1
Property ID	The unique identification number for the property.	79420
Property	The name and unit number of the property.	Sumida Bell Flat 101
Staff Payout	The amount paid to the staff for services at this property.	2000
Transportation	The transportation allowance for the staff for this property.	800
Active	A boolean (TRUE/FALSE) indicating if the property record is currently active.	TRUE

The **'Cleaning Staff Payout'** sheet tracks the payment details for staff associated with various properties, including the property identifier, the specific property name, the **Staff Payout** amount, and the **Transportation** allowance. It also indicates if the property record is **Active**.

Here is the data structure for the current sheet presented in the requested table format:

Column Name	Description	Data Sample
ID	A unique record identifier.	1
Property ID	The unique identification number for the property.	1
Property	The name and unit number of the property.	JSR 201
Staff Payout	The amount paid to the staff for services at this property.	2000
Transportation	The transportation allowance for the staff for this property.	800
Active	A boolean (TRUE/FALSE) indicating if the property record is currently active.	TRUE

The **'Client Validation'** sheet is a directory of clients, detailing their unique ID, name, preferred payment and invoicing methods, the type of service they use, and their contact addresses. It also tracks their current **Is Active** status.

Here is the data structure for the current sheet presented in the requested table format:

Column Name	Description	Data Sample
ID	A unique numerical identifier for the client.	1
Name	The name of the client.	Devin Norby
Payout Method	The method used to pay out to the client (e.g., Bank Transfer, Cash).	Bank Transfer
Invoice Method	The client's preferred method for handling invoices.	Subtract from Payout
Invoice Type	The main type of service the client is being invoiced for.	Vacation Rental Cleaning
Address	The street address of the client.	3 Chome-8-11 Mukojima, Sumida
Address2	Secondary address information (e.g., city, country).	Tokyo, Japan
Address3	Tertiary address information (e.g., postal code).	131-0033
Is Active	A boolean (TRUE/FALSE) indicating if the client is currently active.	TRUE

The **'Staff Validation'** sheet serves as a registry for personnel, detailing their unique ID, name, full name, preferred **Payment Method**, their tax status (**Tax**), and their current employment status (**Is Active**).

Here is the data structure for the current sheet presented in the requested table format:

Column Name	Description	Data Sample
ID	A unique numerical identifier for the staff member.	1
Staff	The first or common name of the staff member.	Aiko
FullName	The full legal name of the staff member.	Ma Aiko Reyes
Payment Method	The preferred method for receiving payment.	Bank Transfer
Tax	A boolean (TRUE/FALSE) indicating the tax status (e.g., being taxed).	TRUE
Is Active	A boolean (TRUE/FALSE) indicating the current employment status.	FALSE

The **'Staff Validation Vacation'** sheet is a staff roster primarily used for tracking employee details, including their unique IDs, names, current active status, and most importantly, their start date, likely for calculating tenure and vacation eligibility.

Here is the data structure for the current sheet presented in the requested table format:

Column Name	Description	Data Sample
ID	A unique numerical identifier for the record.	1
Staff ID	The unique numerical ID assigned to the staff member.	2
Staff	The common name of the staff member.	Alexa
FullName	The full name of the staff member.	Ma Aiko Reyes
IsActive	A boolean (TRUE/FALSE) indicating the current employment status.	FALSE
Start Date	The date the staff member began employment, used for tenure tracking.	6/23/2015

The **'Supply Validation'** sheet lists inventory items, tracking details like the type of supply, minimum stock levels, purchase quantities, and the estimated price versus the client invoiced amount for each item.

Here is the data structure for the current sheet presented in the requested table format:

Column Name	Description	Data Sample
ID	A unique product identifier.	astp001
Client ID	The ID of the client associated with the supply item.	2
Supplies	The name of the inventory item.	Toilet Paper
Description	A brief explanation of the supply unit or use.	6 roll/property
Minimum Inventory	The lowest stock level required.	18
Purchase Quantity	The standard amount to purchase.	108
Estimated Price	The expected cost of the supply.	29
Client Invoice	The price billed to the client for the supply.	38
Type	The category of the supply (e.g., Consummables, Refillable).	Consummables

\

The **'Linen Validation'** sheet tracks laundry inventory, associating each linen item with a unique ID and a client ID. It validates the pricing by listing the item name and comparing the **Client Price** (what the client is charged) against the **Real Price** (the actual cost or standard price).

Here is the data structure for the current sheet presented in the requested table format:

Column Name	Description	Data Sample
ID	A unique identifier for the linen item.	ashd001
Client ID	The ID of the client associated with the linen item.	2
Linens	The name of the linen item (including local translation).	Single Duvet 掛カバー（シングル）
Client Price	The price charged to the client for this linen item.	260
Real Price	The actual or standard cost of the linen item.	260
